

Summary of Issues Resolved in PIC Release 5.3

Submodule	Description
50058	Change the headings on all PIC 50058 reports to show the "report date" as well as the period covered by the report. For example, where the report currently shows "Delinquency Report" add the report generation date, i.e., "Delinquency Report - September 30, 2003." Change the Report Start and End Dates to "Effective Dates Included". For this example, the dates would show October 01, 2002, through January 31, 2004. This would eliminate any confusion as to what information is included in the report.
50058	Some HAs have reported that they received a fatal error for submissions relating to change of head of household. The fatal error is that the record is already present for the new head of household.
50058	Some PHAs have reported errors regarding the unit structure type (Field 5k) when submitting action type 9 (Annual Re-exam searching).
50058	When users are sending in action type 10 and/or 12, only the first other special program indicator for field 2n (if data is present) is being read in, validated, and persisted to the database. Any remaining indicators sent are ignored when sending action type 10/12. If more than one other special program indicator is sent, the submission process needs to read in, validate, and present all indicators sent in field 2n. Specifically Special.java and SpecialConverter.java need to be modified to fix this defect.
50058	Some users have reported that when they submit Action type 14 (Historical Adjustment), the submissions get processed without any errors however the tenant information does not show up in the viewer.
50058	A user has reported that they are receiving fatal error 4173 despite the fact that the effective date of submission is valid. Analysis of this issue has revealed a bug in the submission code. In this particular instance the bug occurs in the VLBasic.checkBasicForSpecial() method where the validations occur for the effective date. The problem occurs as a result of the same calendar object being modified to perform all the validation checks. For example in one instance the code subtracts three months from the calendar object, performs the validation, and then adds the three months back. The problem with this approach is revealed when you take a date such as July 31, 2003. If we subtract 3 months from this date it will result in an object that represents April 30, 2003. However, if we now add three months back to the object, we do NOT get the original date (July 31, 2003) but rather July 30, 2003. VLBasic.checkBasic() should also be checked to see if this same invalid approach is applied there as well.
50058	If you go to the Rent Calculation Tab, - Select Level of Information: Project - Project Selection: Within a State - Select State: any from the list - Select Project(s) from: Select any 2 projects and press Reports button When Report window will be opened: - Select another project from "Select Project Code" list and you will see the error: Microsoft VBScript runtime error '800a000d' Type mismatch /pic/MTCS/Reports/MTCSrentcalcreport.asp, line 759
50058	Viewer is displaying incorrect rent information for Certificates. Specifically fields 11N, 11R, 11S, 11T. ASP page MTCScertificate.asp needs to be modified to refer to the exact array numbers, they are now shifted by one and therefore displaying incorrect numbers.
50058	In 50058 Viewer, "Background at Admission" page is displaying an incorrect Zipcode

PIC Summary of Issues Corrected in Release 5.3

Submodule	Description
50058	Issuance and Expiration Voucher Report does not include records for Update End ("To") Date.
50058	RCR report displays incorrect number of total available units at the development level for those developments whose total available units is zero.
50058	When user clicks on any one of the Iss/Exp records, the first name and last name information of the tenant is incorrect. The rest of the information displayed regarding the tenant is correct.
50058	Currently, the "Replace AID" allows the users to replace AIDs for tenants with other AIDs, which is incorrect. It should allow the AIDs to be replaced with actual SSNs ONLY and not with other AIDs.
50058	the information displayed for field 17m(3) in the viewer is incorrect. Specifically, the description for field 17m(3) is not correct
50058	When trying to generate a new AID, the "Date of Birth" field requires the following format 'MM/DD/YYYY'. After entering a date with no slashes '/', no alerts are displayed to the user and the page is not submitted. In mtcsgenerateAID.asp [javascript function validateDate], an alert should be added so that a pop-up window is displayed to the user with an invalid date statement.
50058	For the Delinquency Report specifically all tenant-based Section 8 records should be displayed in a single line that would be labeled "tenant based assistance". This single line would encompass records for Vouchers, PB Certificates and PB Vouchers. Right now the label is "Certificates and Vouchers"
50058	In the "Reporting Rate" column change the bolded and red colored percentages to those that are less than 85 percent. In addition, eliminate the "***" that shows after the percentages that are bolded and colored red. Currently, percentages that are over 100 percent are bolded and colored in red. This is not helpful as the report is designed to identify PHAs that are not meeting the minimum reporting rate.
50058	When printing the entire delinquency report, the column headings are not repeated on each page. Repeat column headings on each printed page
50058	(1) Change column headings as shown below: "Available" becomes "ACC Units" "Occupied" becomes "50058 Required" "Number Reported" becomes "50058 Received" "Missing" becomes "Difference" "Percent Reported" becomes "Reporting Rate" (2) Eliminate the following columns: "Field Office Code" – The code is already shown in the report heading. "Field Office Name" – The Field Office is already shown in the report heading. "Administered/Occupied" - Its only use is for tenant-based assistance. "Forms Received" – These three columns ("Last month", "Last 3 months", "Last 6 months" are not necessary. (3) Change the order of the columns in the Delinquency Report to the following L to R order (Excel spreadsheet example is attached): 1. HA Code 2. HA Name 3. Program Type 4. Available --- to be changed to "ACC Units" 5. Occupied ---- to be changed to "50058 Required" 6. Number Reported ----- to be changed to "50058 Received" 7. Missing ---- to be changed to "Difference" 8. Percent Reported to be changed to "Reporting Rate"
50058	<i>Currently, Form 50058 submission module allows the active indicator to be set to "Y" only when users submit New Admission for the tenants and NOT when users submit Historical Adjustment. Since, the active indicator is not set to "Y" when submitting historical adjustment for the tenants, AIDs for these tenants cannot be replaced with their actual SSNs.</i>

PIC Summary of Issues Corrected in Release 5.3

Submodule	Description
Adhoc Reports	Ad-hoc module currently allows the users to select action types 8 (FSS/WTW Addendum) and 13 (Annual HQS Inspection). But, when a user submits a 50058 form with action type 8 or action type 13, the action type is NOT updated in the database but all the other information submitted in the form is updated in the database. This SCR is raised so that the action types 8 and 13 are not made available to the user for selection.
Demolition/Disposition	Eliminating Hardcoded Error Messages In Demo Dispo
Demolition/Disposition	Demo-dispo - Wrong Display Of Non Residential Acres
Development	RASS Report – Default sort By Development / Bldg / Bldg Entrance / Unit Number (key identifying fields)
Development	Ability to Change building type from Non-Dwelling structure type to any other Dwelling structure types.
Development	Add capability in Development submodule in unitlist.asp to jump ahead in developments with many units (e.g., NY005001, under the "Unit Information" bar it says "1-50 of 2545", allow user to click directly to any of the 1-51 batches of 50 units each).
Development	Under Development submodule, Reports, Upload Task list, when I try to generate a report for Upload Task List got error
Development	The roles for certain users with access to the Building Page group in the Development sub-module are incomplete. All users who have access to the building details page may not have access to the building list page.
Development	Unit Reports: User cannot navigate to the next page of the unit report once the report is summarized by development
Development	PHA cannot edit the building information until the floor count should be positive or greater than zero and construction date should be lesser than the occupancy date. When PHA tries to insert a new floor count defaults back to 0 and the date resets back to whatever it was before. It's like cat chasing its tail for them.
Development/ Hsg Authority/ Executive Summary	Remove unwanted "?" from PIC Reports.
Housing Authority	HA Report retrieving all contact(Active or Inactive) with Roles of Formula characteristics. Stored procedure & Asp changes required.
Housing Authority	Development Summary report and HA summary Reports throw asp error for certain PHAs
Housing Authority	Unwanted '?' marks appearing on the Ha Profile Report in Internet Explorer.

PIC Summary of Issues Corrected in Release 5.3

Submodule	Description
Housing Authority	HA Occupancy report shows incorrect count for Total Non Dwelling units.
Housing Authority	PIC collects the email address of the HA contacts through HA sub module. PIH is in the process of correcting email address in PIC and found erroneous email addresses. The recommendation to prevent this is to add a new text field to re-enter the email address. Email Address should n't accept 'www.' or 'WWW.' after the '@' symbol.
Housing Authority	Do not permit temporary assignment of an HA to it's own current field office
Housing Authority/ Executive Summary	In HA Profile Report, under address section it reads "Country name" where it should be "county name."
Reference	<i>PIC headlines should allow embedded HTML tags in headline body text. Also the field labels 'Headline Summary' and 'Headline Body' shouldn't be displayed before actual content.</i>
Security Admin	In the Security Admin submodule, navigating from the Security business function to Reports business function and back to the Security business function changes the appearance of the page (in Netscape ONLY) - the navigational dropdown menus disappear.
Security Admin	Remove the functionality for users to create local roles.
Security Admin	In the User Activity Query asp page, dates (From & To) are displaying invalid dates in January. Date validation added for From & To date text fields.
Security Admin	The Bulk Copy Option In The Pic Maintenance Module Is Not Working Properly. In production users were complaining that it does not work with 3 or more users.
Security Admin	Security - Modify To Display % Sign (in red) by the name of anyone who has Security Admin. Access at any level.
Security Admin	User security modified to improve display and make data presentation more useful
SEMAP	Enabling SEMAP Indicator 12.
SEMAP	The application will use the most recent approved profile as the baseline for creating the appeal profile. The current implementation uses the most recent profile, which is incorrect.
SEMAP	Before submitting to Field office or HQ office, PHA will have rights to delete the newly created appeal.
SEMAP	SEMAP - Ability To Modify PHA Comments

PIC Summary of Issues Corrected in Release 5.3

Submodule	Description
SEMAP	Fully disabling 11th indicator (Pre-contract HQS Inspection) from PIC User Interface
SEMAP	Prevent The User From Submitting An Incomplete SEMAP Certification.
SEMAP	Fix so that the 8th indicator will highlight if payment standards in red even if the values are zero (also it should highlight if payment standards in red if they are outside of 90% - 110% of the FMR values)
